DECLARATION OF JOHN M. HARMAN UNDER 37 C.F.R. §1.131

Sir:

I, John M. Harman, state that:

1. I am over the age of twenty-one (21) years. I am not suffering from any disabilities, I am competent to make this Declaration, and have personal knowledge of the facts set forth herein.
2. I was an employee of Lucent Technologies Inc. (Lucent) at the time of the invention of the parent application (Serial number 09/891,903, now U.S. Patent 6,776,012) of the above-referenced patent application.
3. I drafted the parent application of the above-referenced patent application on behalf of Lucent and the above-referenced inventors during the period between January 26, 2001, when the invention disclosure for the parent application of the above-referenced patent application was first delivered to our office, and June 26, 2001, when the parent application was filed.

4. During the period from January 26, 2001, to June 26, 2001, I had a reasonable backlog of unrelated cases, including the applicants' case. I prepared these cases in chronological order and in a reasonably expeditious manner.
5. During the period from January 26, 2001, to June 26, 2001, I was also directly involved in negotiations associated with the sale of Lucent's Optical Fiber Solutions business unit. These negotiations included the evaluation of approximately 900 of Lucent's patents and patent applications (and their foreign counterparts) that ultimately would be transferred to the purchaser of this business unit. This business unit was sold on November 16, 2001 to Fitel USA Corp. – the current assignee of the above-referenced patent application and the parent.

I HEREBY DECLARE that all statements made herein of my own knowledge are true, and that all statements made on information and belief are believed to be true, and that these statements are made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code, and that any such willful false statements may jeopardize the validity of the above-referenced patent application, or any patent issued thereon.

John M. Harman
